SUMMARY

Fresh Graduate in Geomatics Engineering from Institut Teknologi Sepuluh Nopember (ITS) with a GPA of 3.41/4.00 and a Very Satisfactory distinction. Possesses strong competencies in Geographic Information Systems (GIS), spatial data analysis, surveying and mapping, remote sensing, photogrammetry, and 3D modeling. Experienced in geospatial projects and professional internships involving land asset mapping, spatial database management, and geospatial data processing. Demonstrates strong analytical and problem-solving skills, adaptability, and the ability to collaborate effectively both independently and as part of a multidisciplinary team to deliver accurate, efficient, and results-oriented solutions.

EDUCATION

Sepuluh Nopember Institute of Technology Bachelor of Engineering in Geomatics Engineering - GPA: 3.41/4.00 - Thesis on "3D Modeling of Candi Tikus Using Integrated UAV and Terrestrial Photogrammetry Data Based on the Gaussian Splatting Method"	Jul 2022 - Aug 2026
SMA Negeri 1 Bangsal Science Major (MIPA) Average Grade : 90.23/100	Jul 2019 - May 2026

INTERNSHIP EXPERIENCE

PT Kereta Api Indonesia (Persero) Regional Operation VII Madiun - Conducted asset mapping and digitization of unregistered land parcels, covering operational and non-operational railway corridors and station areas in Madiun and Jombang. - Performed high-precision terrestrial surveys using GNSS techniques, including GPS NTRIP and Geodetic Base-Rover configurations, to acquire accurate spatial coordinates. - Processed and analyzed geospatial datasets to produce cadastral maps that supported asset management and land certification initiatives.	Jul 2025 - Aug 2025
National Land Agency (ATR/BPN) of Kediri City - Processed and updated spatial datasets and cadastral maps to support land administration and urban planning activities. - Conducted field surveys and boundary verification by measuring parcel and building boundaries to ensure accurate spatial delineation. - Applied geospatial data processing and terrestrial surveying techniques to address practical challenges in cadastral management and land information services.	Jan 2025 - Feb 2025
National Land Agency (ATR/BPN) of Batu City - Digitized land parcel spatial data and updated cadastral databases within the digital land information system. - Verified land ownership records (SHM) by cross-checking physical land certificates with institutional databases to ensure data accuracy and legal compliance. - Conducted field measurements using Geodetic GNSS equipment to obtain high-precision boundary coordinates in accordance with cadastral mapping standards.	Jul 2024 - Aug 2024

ORGANIZATIONAL EXPERIENCE

- Student Legislative Board, Faculty of Civil, Planning, and Geo Engineering** **Nov 2024 - Feb 2026**
(BLM FT-SPK ITS)
- Served as Session Chairperson and organizing committee member of the Musyawarah Tingkat Tinggi (MTT) of FT-SPK ITS.
 - Managed administrative affairs and official correspondence to support the preparation and implementation of organizational activities.
 - Coordinated with stakeholders to ensure the effective execution of activities and orderly decision-making processes in accordance with organizational procedures.

- Student Representative Council, Geomatics Engineering Student Association** **Dec 2024 - Dec 2025**
(BPM HIMAGE-ITS)
- Developed the General Guidelines of Organizational Direction (GBHK) for the HIMAGE-ITS management period.
 - Reviewed and formulated organizational policies and regulations to support effective governance.
 - Guided commission members and coordinated legislative functions in policy formulation and organizational decision-making.

- Student Representative Council, Geomatics Engineering Student Association** **Dec 2023 - Dec 2024**
(BPM HIMAGE-ITS)
- Represented student aspirations through the drafting and review of internal organizational policies.
 - Analyzed and developed policies to ensure alignment with organizational needs and objectives.
 - Collaborated with functional teams to support the implementation of approved policies and initiatives.

PROJECTS

- 3D Modeling of Candi Tikus Using Integrated UAV and Terrestrial Photogrammetry Data Based on the Gaussian Splatting Method** **Nov 2025 - June 2026**
- Bachelor's Thesis Project
- Integrated UAV and terrestrial photogrammetry datasets for cultural heritage documentation.
 - Developed a 3D Gaussian Splatting model to generate realistic visualizations.
 - Evaluated model quality and rendering performance using geospatial and photogrammetric techniques.
 - Designed and deployed a static project website using Visual Studio Code and Vercel to present project information and visualization results.

- Complete City Project (Kota Lengkap)** **Mar 2024 - Apr 2024**
- Collaboration Project with BPN Surabaya II and Department of Geomatics Engineering, ITS
- Participated in the Complete City Project in collaboration with BPN Surabaya II as part of the Land Administration course.
 - Performed topology corrections on cadastral shapefiles for Tambaksari Village, including the identification and resolution of overlaps and gaps.
 - Repositioned affected spatial objects to maintain topological consistency and improve spatial data accuracy.

ADDITIONAL INFORMATION

- **Technical Skills:** ArcGIS Pro, QGIS, ENVI, Agisoft Metashape, Autodesk Civil 3D, Google Earth Pro, Leica Infinity, HYPACK, Surfer, MATLAB, Python (Basic), Visual Studio Code, HTML, CSS, JavaScript, Microsoft Office, and Vercel Deployment.
- **Languages:** Bahasa Indonesia (Native), English (Professional Working Proficiency)
